

Chrono- and Photo-Ageing

RESURFACE OXBAN GEL EYE CONTOUR PERFECTOR

Based on **0.5% GABA**

Minimise wrinkles and eliminates puffiness and dark circles

OPHTHALMOLOGICALLY TESTED

15 ml/0.50 fl. oz. tube

Description

RESURFACE OXBAN GEL is an eye contour treatment providing an immediate lifting effect. Works by improving skin microcirculation and by decongesting the eye area. Contains a tetrapeptide in association with a complex of vegetable active ingredients, which reduce eye puffiness and visibly attenuate dark circles. Also includes GABA, which relaxes skin and softens wrinkles and provides a lifting effect minutes after application.

Benefits

Clinically tested treatment that counters wrinkles, puffiness and dark circles.

- Reduces wrinkles by 4% after only 30 minutes from application
- Improves visibly the appearance of puffiness and dark circles

How to use

Apply in the morning and evening to the eye contour area. Dab it gently on skin to help absorption and stimulate skin microcirculation.

Contains

- **0.5% GABA**: lifting effect
- TETRAPEPTIDE-5, Pilosella and Bellis Perennis: work on puffiness and dark circles, visibly reducing them
