

Chrono-ageing and photo-ageing

## RESURFACE MD15 PEEL NIGHT TREATMENT

Based on **15% Mandelic Acid**

Renews skin, smooths it and is anti-oxidant.

30 ml/1.01 fl. oz. bottle

### Description

RESURFACE MD15 PEEL is a triple-action night treatment that activates skin renewal, smooths the epidermis and promotes the prevention of skin chrono- and photo-ageing. Its innovative formulation contains a combination of alpha and beta hydroxy acids: 15% Mandelic Acid, 2% Salicylic Acid, and Lactobionic Acid, which perform a delicate peeling action to help to prevent wrinkles, spots and imperfections. It also contains a set of antioxidants, Phytic Acid and Vitamin C that counteract the formation of free radicals responsible for skin ageing. These ingredients work to make skin softer, more radiant and even.

### Benefits

Renews skin through the night.

### How to use

apply in the evening to the face, neck and décolletage once or twice a week. Avoid the eye contour area. Let the product work through the night and, in the morning, cleanse skin and apply Re-Surface C 15 Serum preferably. Store in a cool place.

### Contains

- **15% Mandelic Acid:** prevents dark spots and blemishes, softens fine wrinkles and evens out skin
- 2% Salicylic Acid and Lactobionic Acid: exfoliates and renews skin
- Phytic Acid and Vitamin C: have anti-oxidant effects and brighten up skin
- Niacinamide: brightens skin
