

Chrono and Photo-Ageing

## 8 GLYCO DERMO-STIMULATING FACE CREAM

Based on **8% Glycolic Acid**

Restores firmness and elasticity. Counters damage by free radicals.

*PARABEN-FREE*

50 ml/1.69 fl. oz. tube

### Description

8 GLYCO Dermo-stimulating face cream is ideal to treat fine wrinkles and to restore firmness and elasticity to skin. Its formulation, based on 8% Glycolic Acid, is potentiated with antioxidants, which prevent chrono- and photo-ageing of skin by protecting it from damage by free radicals. Also useful as a maintenance treatment product, combined with aesthetic medicine treatments, such as peels and laser, to extend treatment results.

### Benefits

Increases cell turnover, illuminating the complexion. Stimulates the production of collagen and elastin and prevents damage from free radicals, softening skin ageing signs.

### How to use

Apply in the morning and evening after cleansing skin. Do not expose to sunlight after application.

### Contains

- **8% free and micro-encapsulated Glycolic Acid**: the latter allowing slow-release and prolonged smoothing and elasticising effects while, at the same time, softening fine lines and restoring firmness and elasticity to the epidermis. Skin looks more radiant, supple and compact.
- Ferulic acid and Lycopene: anti-oxidants.

### Ingredients (INCI)

AQUA (WATER), GLYCOLIC ACID, ETHYLHEXYL METHOXYCINNAMATE, ETHYLHEXYL COCOATE, GLYCERYL STEARATE, PEG-100 STEARATE, DIETHYLAMINO HYDROXYBENZOYL HEXYL BENZOATE, CETEARYL ALCOHOL, GLYCERIN, TITANIUM DIOXIDE, C12-15 ALKYL BENZOATE, PRUNUS ARMENIACA (APRICOT) KERNEL OIL, CYCLOPENTASILOXANE, PHENOXYETHANOL, CAPRYLIC/CAPRIC TRIGLYCERIDE, DIMETHICONE, TOCOPHERYL ACETATE, CYCLODEXTRIN, POLYHYDROXYSTEARIC ACID,

# CANOVA®
