Dermatitis and sensitised skin

ALOEZINC 20 **SOOTHING CREAM**

Based on **20% Zinc Oxide**

Favours the re-epithelisation and
repair of the epidermal barrier

75 ml / 2.54 fl. oz. tube

Description

ALOEZINC 20 is a soothing cream recommended for protecting delicate, sensitive skin that is prone to irritation, redness and chapping. The strong epithelium-repairing effect and protection it provides make it an effective cosmetic adjuvant for the therapies of eczematous conditions (atopic dermatitis and contact dermatitis) and a recommended treatment for diaper rash. Has a special formula based on a high concentration of Zinc Oxide (20%). Also contains Aloe Vera, 18-β-Glycyrrhetic acid and vegetable lipids to soothe and soften skin and also protect it from environmental agents that might trigger irritation.

Benefits

Protects very sensitive skin, preventing redness. Soothes skin redness.

How to use

Apply once or more times a day on areas requiring treatment by gently rubbing until product is fully absorbed.

Contains

- **20% Zinc Oxide:** used in a finely micronized form, it is strongly soothing and protective
- Aloe Vera: anti-inflammatory and moisturises skin
- 18-β-Glycyrrhetic acid: a well-known soothing and repair agent
