

Dermatitis and sensitised skin

ALOEZINC SOOTHING SPRAY

Based on **10% Zinc Oxide**

Soothes skin redness and irritation.

**PERFUME-FREE, PARABEN-FREE,
PHENOXYETHANOL-FREE**

100 ml / 3.38 fl. oz. bottle

Description

ALOEZINC Soothing spray is recommended for protecting delicate, sensitive skin that is prone to irritation, redness and chapping. The strong epithelium-repairing effect and protection it provides make it an effective cosmetic adjuvant for the therapies of eczematous conditions (atopic dermatitis and contact dermatitis) and a recommended treatment for diaper rash. Has a lightweight texture that is rapidly absorbed. Comes with a spray dispenser that allows to apply the product directly onto skin with no need to rub it. Has a very high tolerability.

Benefits

Protects very sensitive skin, preventing redness. Soothes skin redness.

How to use

Shake well before use. Spray at a distance of 10-15 cm onto areas requiring treatment. Rubbing the product in is not necessary.

Contains

- **10% Zinc Oxide:** used in a finely micronized form, it repairs and protects skin.
- Glycerophosphoinositol: helps to reduce inflammation and itch.
- Aloe Vera: anti-inflammatory and moisturises skin
- 18-β-Glycyrrhetic acid: a well-known soothing and repair agent.

CANOVA®
