

Scar treatment and keloid prevention

CICANOVA REPAIR CREAM

Based on **Ozonated Olive Oil**

Favours repair of the hydrolipid film of skin and prevents skin thickening and keloids e cheloidi

PERFUME-FREE, PARABEN-FREE

50 ml / 1.69 fl. oz. tube

Description

CICANOVA Repair cream is specifically recommended for supporting epidermis trophism in the case of reddened, chapped skin. Speeds up the replenishing of the hydrolipid film of skin and, thanks to a high fatty acid content, has emollient and moisturising effects. Useful as a cosmetic treatment for scars to favour skin normalisation and prevent skin thickening and keloids. Excellent also for burns, abrasions and after dermatological and aesthetic medicine treatments (minor surgery, laser, dermoabrasion, peels).

Benefits

Speeds up the replenishing of the hydrolipid film of skin, hydrates and soothes skin, providing relief to itch. Ideal for scars, prevents skin thickening and keloids.

How to use

Apply twice a day on clean, dry skin.

Contains

- **2% Ozonated Olive Oil**: favours the replenishing of the hydrolipid mantle of skin and, in addition, it hydrates and soothes skin, providing relief to itch. It is also anti-bacterial.
- Hyaluronic acid: has a moisturising effect

Ingredients (INCI)
