SENSIVEN 50+ SOOTHING CREAM

Based on **16% Blue Light Ban Complex®**

Topical, soothing and vaso-protective treatment, with very high protection sun filters. Protects from UVA-UVB radiation and BLUE LIGHT.

PARABEN-FREE

50 ml / 1.69 fl. oz. tube

Description

SENSIVEN 50+ Soothing cream is a treatment with a strong soothing effect, designed to reduce typical couperose skin blemishes and relieve related symptoms. It is based on Rutin and Diosmin, which stimulate the trophism of capillaries and favour their physiological permeability, and a set of sun filters, which ensure very high UVA and UVB protection. The product also contains a set of filters to specifically protect skin from blue light and the oxidative damage it induces.

Benefits

Very high UVA and UVB protection; protects from BLUE LIGHT and from oxidative damage it induces. Rebalances the trophism of microcirculation and strengthens vessel walls. Reduces inflammation, redness and itch.

How to use

Apply daily on face. Repeat application several times a day.

Contiene

- **16% Blue Light Ban Complex®**: innovative filtering system specific for UVA, UVB and BLUE LIGHT.
- **Diosmin**: glycoside flavonoid of natural origin, protects vessels, is anti-inflammatory and anti-oxidant.
- **Rutin 1%**: a natural substance found in plants belonging to a number of families, Rutin is a powerful antioxidant and a vasoprotector, which works by strengthening the capillary wall. For these properties, it is used broadly in cosmetics as a topical therapy for capillary fragility.
- **Symcalmin®**: anti-irritant / anti-itch complex. Reduces pruritus and inflammation.
- **Biophytex**: complex based on Aescin, Ruscus, Centella Asiatica, Calendula. Improves problems related to capillary fragility and reduced microcirculation in the face in general.
