

Mild and moderate acne

SALIPIL MASK PEEL-OFF MASK

Based on **2% free and micro-encapsulated Salicylic Acid**

Exfoliates skin and regulates sebum

PERFUME-FREE PARABEN-FREE

8 single-use sachets of 10 ml each

Description

SALIPIL MASK Peel-off mask is a special face treatment recommended for combination, oily and acne-prone skin. The particular peel-off mode of use allows to effectively remove skin impurities. The product contains Salicylic Acid at a functional concentration of 2%, which has keratolytic and exfoliating properties. Ideal also in case of mature skin showing acne blemishes. The peel-off technology of the mask allows to obtain a more rapid and deeply-purifying effect that visibly reduces the number of comedones on the skin and progressively normalises sebum production.

Benefits

Reduces the production of sebum and prevents it, purifies skin, eliminates imperfections, soothes and moisturises skin.

How to use

After cleansing skin, apply the content of a sachet over the face in a thin layer and avoiding the eye area. Leave on until it fully dries (about 20-25 minutes), then gently peel off of the face. Remove any residue with lukewarm water.

Contains

- **2% Salicylic Acid:** microencapsulated, has exfoliating and sebum-regulating properties. Favours the improvement of acne blemishes.
- Red vine leaf extract: protects skin capillaries and has an anti-inflammatory effect
- Low-molecular-weight hyaluronic acid: has a moisturizing effect. Increases water in skin by diminishing TEWL (trans-epidermal water loss).

CANOVA®

Ingredients (INCI)

AQUA, POLYVINYL ALCOHOL, SALICYLIC ACID, POLYDEXTROSE, DEXTRIN, CAPRYLYL GLYCOL, 1,2-HEXANEDIOL, AMYLOPECTIN, NIACINAMIDE, IMIDAZOLIDINYL UREA, TETRASODIUM EDTA, PROPYLENE GLYCOL, TROPOLONE, VITIS VINIFERA LEAF EXTRACT, SODIUM HYALURONATE, PHENOXYETHANOL, SODIUM BENZOATE, POTASSIUM SORBATE.
